regulations to improve identification techniques against ASR concrete degradation at nuclear power plants. The NRC has determined that the petition meets the threshold sufficiency requirements for a PRM under § 2.802 of Title 10 of the Code of Federal Regulations, “Petition for rulemaking,” and the petition has been docketed as PRM–50–109. The NRC is requesting public comments on this PRM.

IV. Discussion of the Petition

At an NRC public meeting at Seabrook Station on June 24, 2014, the petitioner asked the NRC if the agency was investigating the U.S. nuclear fleet for ASR concrete degradation. The NRC staff responded that ASR concrete degradation could be adequately indicated through visual examination. However, an NRC position paper, “In Situ Monitoring of ASR-affected Concrete,” November 2012 (ADAMS Accession No. ML13108A047), states, “ASR can exist in concrete without indications of pattern cracking,” and that for “... structures exposed to ASR, internal damage occurs through the depth of the section but visible cracking is suppressed by heavy reinforcement. ...” When NextEra determined 131 locations with “assumed” ASR visual signs within multiple power-block structures at Seabrook Station during 2012, further engineering evaluations were not required by the NRC.

The petitioner requests that the NRC amend its regulations to improve identification techniques against ASR concrete degradation at U.S. nuclear power plants. The petitioner suggests that the reliance on a visual inspection does not “adequately identify Alkali-Silica Reaction (ASR),” does not confirm ASR, or provide the current state of ASR damage (if present) without petrographic analysis under current existing code.” The petitioner asserts that codes and standards exist that are capable of detecting ASR and determine the key material properties needed to evaluate the degree and severity of ASR damage. American Concrete Institute (ACI) Standard 349.3R, “Evaluation of Existing Nuclear Safety-Related Concrete Structures,” for instance, has been endorsed by the NRC (ADAMS Accession No. ML112241029) as an acceptable method of protecting against excessive ASR concrete degradation, but is not a regulatory requirement. The petitioner requests that the NRC amend its regulations to require that all licensees comply with industry codes and standards that have “already been endorsed by the agency,” and identified two standards for which the NRC’s regulations should require compliance: (1) ACI Standard 349.3R; and (2) American Society for Testing & Materials (ASTM) C856–11, “Standard Practice for Petrographic Examination of Hardened Concrete.”

Dated at Rockville, Maryland, this 5th day of January, 2015,

For the Nuclear Regulatory Commission.
Annette L. Vietti-Cook,
Secretary of the Commission.

DEPARTMENT OF ENERGY
10 CFR Part 431

RIN 1904–AC55

Energy Efficiency Program for Commercial and Industrial Equipment: Energy Conservation Standards for Commercial and Industrial Fans and Blowers

ACTION: Extension of public comment period.

SUMMARY: On December 10, 2014, the Department of Energy (DOE) published a notice of data availability (NODA) which presented a provisional analysis that estimates the potential economic impacts and energy savings that could result from promulgating a regulatory energy conservation standard for commercial and industrial fans and blowers. DOE did not propose any energy conservation standard for commercial and industrial fans and blowers. However, DOE published its analysis and the underlying assumptions and calculations, which may ultimately support a proposed standard, for stakeholder review. In response to requests by stakeholders, the comment period for the NODA is being extended to February 25, 2015.

DATES: The comment period for the notice of data availability relating to commercial and industrial fan and blower equipment is extended to February 25, 2015.

ADDRESSES: Interested persons may submit comments, identified by docket number EERE–2013–BT–STD–0006 and/or Regulation Identification Number (RIN) 1904–AC55, by any of the following methods:

- Email: CIFB2013STD0006@ee.doe.gov. Include EERE–2013–BT–STD–0006 and/or RIN 1904–AC55 in the subject line of the message.
- Mail: Ms. Brenda Edwards, U.S. Department of Energy, Building Technologies Program, Mailstop EE–5B, 100 Independence Avenue SW., Washington, DC 20585–0121. If possible, please submit all items on a compact disc (CD), in which case it is not necessary to include printed copies. [Please note that comments and CDs sent by mail are often delayed and may be damaged by mail screening processes.]

- Docket: The docket is available for review at www.regulations.gov including Federal Register notices, public meeting attendee lists and transcripts, comments, and other supporting documents/materials. All documents in the docket are listed in the www.regulations.gov index. However, not all documents listed in the index may be publicly available, such as information that is exempt from public disclosure. The rulemaking Web page can be found at: http://www1.eere.energy.gov/buildings/appliance_stands/rulemaking.aspx/ruleid/25. This Web page contains a link to the docket for this notice on the regulation.gov site. The www.regulations.gov Web page contains instructions on how to access all documents in the docket, including public comments.

FOR FURTHER INFORMATION CONTACT:

For further information on how to submit a comment and review other public comments and the docket, contact Ms. Brenda Edwards at (202) 586–2945 or by email: Brenda.Edwards@ee.doe.gov.

SUPPLEMENTARY INFORMATION: On December 10, 2014, DOE published a
notice of data availability (NODA) in the Federal Register to make available and invite comments on its provisional analysis regarding energy conservation standards for commercial and industrial fans and blowers. 79 FR 73246. The NODA provided for the written submission of comments by January 26, 2015. The Air Movement and Control Association International (AMCA) and the Appliance Standards Awareness Project (ASAP) requested an extension of the public comment period by 45 days. Stakeholders stated that additional time is necessary to review the published analysis in order to provide, prepare, and submit comments accordingly. DOE has determined that extending the comment period to allow additional time for interested parties to submit comments is appropriate based on the foregoing reason. However, DOE believes a 30 day extension, providing a total comment period of 75 days, allows sufficient time for submitting comments. Accordingly, DOE will consider any comments received by midnight of February 25, 2015, and deems any comments received by that time to be timely submitted.

Issued in Washington, DC, on December 31, 2014.

Kathleen B. Hogan,
Deputy Assistant Secretary for Energy Efficiency, Energy Efficiency and Renewable Energy.

SUPPLEMENTARY INFORMATION:

Issued in Washington, DC, on December 31, 2014.

Kathleen B. Hogan,
Deputy Assistant Secretary for Energy Efficiency, Energy Efficiency and Renewable Energy.

For detailed instructions on submitting responses and comments, see the SUPPLEMENTARY INFORMATION section of this document.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION: On January 5, 2015, the ISO/RTO Council (IRC) filed a motion requesting a 10-day extension of time (motion) until January 22, 2015 to submit answers to the data requests issued on December 12, 2014, as requested by the Office of Energy Policy and Innovation, in the above-referenced proceeding. In its motion, IRC states that the additional time is needed due to the amount of source data required to review, the intervening holidays, and other intervening data response commitments.

Upon consideration, notice is hereby given to all parties that IRC’s motion is granted, extending the deadline to submit answers to and including January 22, 2015; and to submit comments in response to those answers, to and including February 2, 2015.

SUMMARY: On December 12, 2014, pursuant to authority delegated to the Director, Office of Energy Policy and Innovation, a data request was issued to each ISO and RTO regarding the effect on the reliable and efficient operations of natural gas-fired generators of the current 9 a.m. CCT start to the Gas Day. The requests seek data from the ISOS/ RTOs with respect to derates by natural gas generators during the morning ramp period. This notice extends the deadline to submit answers in response to these data requests.

DATES: Responses to the data request must be filed on or before January 22, 2015 in Docket No. RM14–2–000. Comments on the responses to the data request must be filed in the same docket within 10 days of the data request response, on or before February 2, 2015.

ADDRESSES: Responses and Comments, identified by docket number, may be filed in the following ways:

• Electronic Filing through http:// www.ferc.gov. Documents created electronically using word processing software should be filed in native applications or print-to-PDF format and not in a scanned format.

• Mail/Hand Delivery: Those unable to file electronically may mail or hand-deliver comments to: Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE., Washington, DC 20426.

Instructions: For detailed instructions on submitting responses and comments, see the SUPPLEMENTARY INFORMATION section of this document.

AGENCY: Food and Drug Administration, HHS.

ACTION: Notification of public meeting.

SUMMARY: The Food and Drug Administration (FDA or we) has made available for public review and comment the Draft Environmental Impact Statement (EIS) for the proposed rule establishing standards for the growing, harvesting, packing, and holding of produce for human consumption. The document is available in Docket No. FDA–2014–N–2244. FDA is also announcing a public meeting to discuss the Draft EIS. The purpose of the public meeting is to inform the public of the findings in the Draft EIS, to provide information about the EIS process (including how to submit comments, data, and other information to the docket), to solicit oral stakeholder and public comments on the Draft EIS, and to provide clarification, as needed, about the contents of the Draft EIS.

DATES: See section II, “How to Participate in the Public Meeting” in the SUPPLEMENTARY INFORMATION section of this document for date and time of the public meeting, closing dates for advance registration, and information on deadlines for submitting either electronic or written comments on the Draft EIS.

ADDRESSES: You may submit comments by any of the following methods:

Electronic Submissions
