

# Indirect Water Heaters (IWH)

## Certification Program

AHRI is the world's most trusted source of performance certified heating, cooling, ventilation and commercial refrigeration equipment and components. Only products that have passed AHRI's rigorous third-party testing can display the AHRI Certified mark. Find certified products at [www.ahridirectory.org](http://www.ahridirectory.org).

## Related Standard

Products in the IWH certification program are tested to AHRI Standard IWH-TS-1, Indirect-Fired Water Heater Testing Standard and supplement Method to Determine Performance of Indirect-Fired Water Heaters.

## Program Scope

This program applies to indirect water heaters having a volume (potable plus heat source) of 120 gallons or less, for which published ratings are available, and which are designed for installation with a hot water boiler(s) as the only heat source.

## Scope Exclusion

- Direct-fired instantaneous or storage water heaters;
- Tankless water heaters;
- Heat pumps water heaters; and
- Combination space heating and water heating appliances.

## Program Highlights

- Participation includes leading North American manufacturers
- Only certification program certifying to a GAMA testing standard

The **AHRI Certification Program** is a voluntary program, administered and governed by the Air-Conditioning, Heating, and Refrigeration Institute (AHRI), which ensures that various types of heating, ventilation, air conditioning, refrigeration, and water heating products perform according to manufacturers' published claims. Products that are certified through the AHRI Product Performance Certification Program are continuously tested, at the direction of AHRI, by an independent third-party laboratory, contracted by AHRI, to determine the product's ability to conform to one or more product rating standards or specifications.
